

Nibblers

UNIVERSAL APPLICATIONS

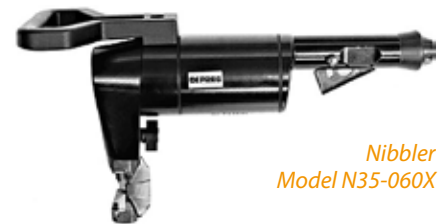

Nibblers are used to “nibble” cold-rolled steel, plastic, alloys, aluminum, and other metals, instead of trimming or sawing. They can also be used to create interior- and exterior cuts. The Nibblers have a tool-head, which can be turned by 90-degrees; this makes cross-cutting possible. The Nibbler Model No. N50-060X can cut corners with critical angles of 90-degrees. N50-060X can be used for the cutting of profiles and pipes. The ergonomically molded 2-hand grip system of the Nibbler N35-060X and N50-060X only requires a minimal effort to operate. N35-060X is equipped with a Halle punch, which allows the nibbler to move in unlimited 360-degree directions (turns on the spot). Punches and dies are easily replaced and the punches can be re-sharpened several times.

Handheld, with a material cutting capacity up to 5-mm

Easy handling

High cutting power

Long lifespan

*Nibbler
Model N35-060X*

SAFETY SPECIFICATIONS

Observe all safety regulations, which is an inseparable component of the delivery of each tool DEPRAG INDUSTRIAL. A safe operation of the tool and its correct function is only possible, if the instruction booklet has been read in detail and if the required instructions are observed.
